

Standards & Engagement

Building The Cybersecure Indian Distributed Energy System

A workshop cum roundtable hosted by: Bureau of Indian Standards (BIS) | Central Electricity Authority (CEA) | UL Standards & Engagement

Under the Smart Meter National Program (SMNP), India initiated the installation of 250 million smart meters. To date, 1.3 million have been installed. Maintaining the cybersecurity of the distributed energy system has been a challenge. As an interim measure, the CEA released a guideline referencing standards which have been adopted or adapted by BIS.

This two-session event will convene stakeholders to build awareness of standards and identify any gaps to further strengthen and derive a timebound action plan for secure systems in India.

Session 1:

Security of the Smart Grid

e-Workshop (hosted via GoToWebinar)
November 30, 2022 | 17:00 – 20:30 IST
Register: s.ul.org/cyber

Session 2:

Drawing an action plan for secure distributed energy system in India

Roundtable Discussion
December 15, 2022 | 17:00 – 19:30 IST
New Delhi [Note: this session is open only to invitees]

Learn from and discuss these topics with experts from the host agencies as well as government bodies, regulators, industry associations and other subject matter experts.
